

FitBuddy AI — AI, Database & Revision Development

Phase 5: Project Development Phase

AI integration

Gemini/Google GenAI integration is documented in `app/gemini_generator.py`. The project uses the current google-genai SDK.

Database

SQLite persistence is implemented through SQLAlchemy; the documented database URL is `sqlite:///./fitbuddy.db`.

Revision

`app/updated_plan.py` is documented for plan update/revision behavior, while `/api/feedback` supports the feedback workflow.
